

Examples of applications

Car industries, aviation, precision bearings and matter with profile

Various measuring units

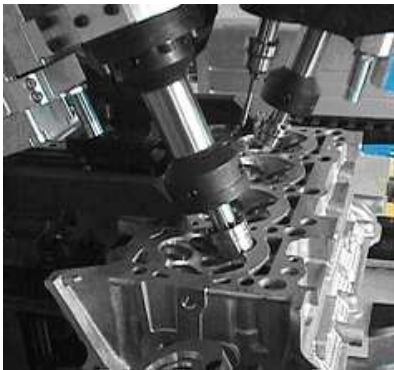

Measure of int. \emptyset and depth of boring

a passion - a Know-how
a program - specialties

Station of control in the car industry Integration in a production line

Control of an engine block

- With evaluations and statistics
- With automatic corrections where rejection

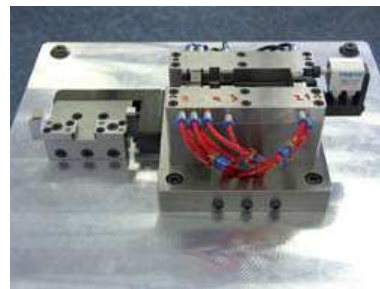

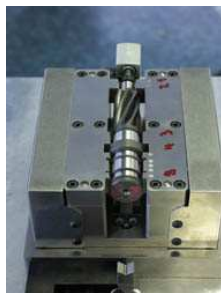

Measure:

- Ø
- Angles of drilling
- Depths
- Chamfers

a passion - a Know-how
a program - specialties

Control of a gearbox shaft

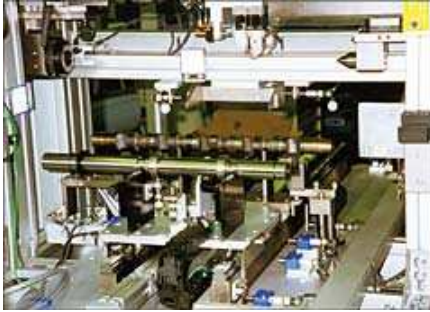

- Measuring unit
- Unit of rotation and installation
- Complete Application

- With evaluations and statistics
- With automatic corrections where rejection

a passion - a Know-how
a program - specialties

Control of car camshafts on a production line

- Geometry Control
- With evaluations and statistics
- With automatic corrections where rejection

a passion - a Know-how
a program - specialties

Control of car rods

- Ø
- Entreaxe
- Height of borings
- With evaluations and statistics
- With automatic corrections where rejection

a passion - a Know-how
a program - specialties
